Ahead.IO Labs Inc.
www.ahead.io

Ahead builds modular, repairable robotic systems. Their platforms include STELLA, the first quadruped robot made in Canada, featuring a fully field-serviceable design and deployed across seven countries. TOAST, their tracked platform, delivers 500 kg payload capacity and 24-hour runtime for forestry, construction, and agriculture. Their software stack enables advanced locomotion, fleet management, and remote operation. They also develop Salem, a first-in-the-world robotic endurance mission across Canada, showcasing the next frontier of autonomous mobility. Learn more at ahead.io and salem.run.

Sector of Activity: Robotics.

Avari Wireless Incorporated
www.avariwireless.com

Avari Wireless is a global leader in advanced in-building wireless coverage solutions, which designs and manufactures Distributed Antenna Systems (DAS) for both private PMR and public safety (PS) emergency responder communications. Avari's innovative DAS solutions enable blue light agency responders in many countries to communicate effectively indoors during emergencies. Avari offers high reliability, high performance digital DAS systems designed to support current and future private and public safety communication requirements (eg. both TETRA and LTE) in complex venues including railway tunnels, airports, metros, stadiums, utilities, large building campuses and more.

Sector of Activity: R&D and manufacturing wireless communications equipment.

Bonzai AI
www.bonzaiai.com

Bonzai AI is a Canadian learning-tech company revolutionizing corporate training with AI-powered video, course creation, and LMS solutions. Their platform transforms documents into engaging, multilingual video courses within minutes, enabling enterprises to scale learning globally with speed and quality. Key differentiators include digital twin avatars, smart translation in 5 minutes, and SCORM-ready exports for seamless LMS integration. Recent milestones include selection among Canada's Top 100 AI companies by SCALE AI, serving clients such as Fujifilm, and receiving Invitalia's S&S Grant.

Sector of Activity: Enterprise Software.

Bonsai Micro
www.bonsai-micro.com

Bonsai Micro develops semiconductor solutions for energy efficient mobile communications, Massive MIMO and Active Phased Array systems. Their technology combines advanced RF sensing with AI/ML algorithms to continuously optimize energy efficiency and performance of next-generation wireless systems.

Sector of Activity: Semiconductors for telecommunications.

Colony Networks Inc.
www.colonynetworks.com

Colony provides the world's easiest to use high availability connectivity as a service. It combines cutting edge 5G & Wi-Fi hardware, their AI powered self serve software, managed services and optional included global connectivity. It can be white labeled by MSPs and CSPs.

Sector of Activity: IoT Solutions, Telecommunications software.

Daanaa Resolution Inc.
www.Daanaa.com

Daanaa Resolution Inc. is a fabless power electronics and semiconductor company in Vancouver, BC. Daanaa created the world's first hyper-conversion ratio (>110x), real-time programmable, ultra-high efficiency (>97%), Bi-Directional DC\AC, all-in-one omni-converter System on a Chip (SoC), and is more than 600 times better than related technologies. It effectively consolidates the functions of up to 20 devices at a fraction of the complexity, size and cost, eliminating the need for string connection of components, multistage conversion, and other intermediary functions or components.

Sector of Activity: AI, Data Centers, Telcommunication, EV.

D-Wave Systems Inc.
www.dwavequantum.com

D-Wave is a leader in the development and delivery of quantum computing systems, software, and services. They are the world's first commercial supplier of quantum computers, and the only company building both annealing and gate-model quantum computers. Their mission is to help customers realise the value of quantum today. Their quantum computers, the world's largest, are available on-premises or via the cloud, supported by 99.9% availability and uptime. More than 100 organisations trust D-Wave with their toughest computational challenges.

Sector of Activity: Quantum Computing.

Emitar Technologies Inc.
www.emtartech.com

1. 6G NTN Beamforming Solutions(Fast Beam Switching Time, High Racking Accuracy, Wide Scan Angles, and Low Power Consumption).
2. Wide-Band GaN Power Amplifier(Single-Chip MMIC Covering n77 and n78, High Efficiency, and High Output Power).
3. Single-Chip GaN PA for Ku/Ka Satellite Payloads(High Efficiency).

Sector of Activity: Semiconductors, 6G NTN, and IoT Solutions.

Expeto Wireless Inc.

www.expeto.io

Expeto delivers a hybrid mobile networking platform that transforms public 4G/5G networks into secure, enterprise-grade connectivity. Their cloud-native solution lets enterprises manage hybrid private and public networks with unified SIM control, end-to-end security, and seamless IT/OT integration—without infrastructure upgrades. Organizations gain faster deployment, secure IoT connectivity, and agility across industries. Mobile operators benefit from new revenue and stronger enterprise ties by offering scalable networking that monetizes 5G and accelerates transformation.

Sector of Activity: IoT solutions and cloud-native 4G/5G mobile networking.

glückkind

Glückkind Technologies Inc.

www.gluckkind.com

Glückkind is a Canadian AI and robotics company redefining pedestrian mobility. Their award-winning smart stroller, Glückkind Ella, features AI-powered push and brake assist, obstacle detection, hands-free operation, and a connected companion app for safer, more effortless walks. Glückkind integrates advanced sensors, edge computing, and adaptive control to deliver the world's first truly intelligent stroller. Built on an automotive-grade platform, their adaptive technology stack enables autonomous navigation, modular mobility, and real-time insights—paving the way for applications beyond parenting.

Sector of Activity: AI, IOT, Hardware.

Incognito Software Systems Inc.

www.incognito.com

Incognito Software Systems provides service orchestration software and services solutions that help fixed service providers manage the next-generation broadband experience. With over 30 years of experience, Incognito has helped global operators accelerate and innovate broadband services over fiber, fixed wireless access, cable, and beyond.

Sector of Activity: Telecommunication software.

iQmetrix

www.iqmetrix.com

iQmetrix is the only provider of Interconnected Commerce software solutions for telecom retail. Interconnected Commerce is a complete set of software and technologies that are modular, flexible, and telecom-specific, enabling telecom retailers to provide an uplifting experience for their customers. Interconnected Commerce solutions are AI-native by design, leveraging the power of artificial intelligence to improve business performance, enhance productivity, and elevate the retail experience.

Sector of Activity: Telecommunications and Enterprise Software (SaaS).

LicenseSpring
www.licensespring.com

LicenseSpring is a powerful cloud-based software licensing platform enabling vendors to securely protect their IP and accelerate product strategy. Their flexible solution allows product teams to launch virtually any business model, including feature gating, expiry, and usage-based licensing. A key differentiator is their ability to easily handle offline environments, simplifying deployment. LicenseSpring reduces development overhead through robust APIs and SDKs, ensuring compliance and maximizing revenue realization. They empower businesses to innovate with confidence.

Sector of Activity: Enterprise software.

M2M Tech Inc.
www.m2mtechconnect.com

At M2M Tech, they build Agentic AI and Edge AI systems that turn operational data into action. Their AURA Agentic Studio powers enterprise workflows (RAG, copilots, automation), while MEA Edge AI devices (Spark/Gateway/Nexus) deliver on-site vision with an “events-not-video” architecture, offline resilience, and sovereign/on-prem deployment. Their key differentiators: rapid value discovery tools, production-ready edge hardware, secure, low-bandwidth analytic.

Sector of Activity: AI, IOT Solutions, Enterprise Software, Telecommunications.

Orbital Research Ltd.
www.orbitalresearch.net

Orbital Research Ltd. is a Canadian leader in high-performance satellite communication components, specializing in Ka-, Ku-, and X-band LNBS and precision oscillators. Their products are engineered for extreme environments and trusted across defense, aerospace, and mobility sectors. Key differentiators include multi-band redundancy, RFI resilience, and rapid customization. Orbital's vertically integrated design and manufacturing enable fast prototyping and deployment. They serve global OEMs and integrators with scalable, future-ready RF solutions.

Sector of Activity: Satellite Communications.

PROCOGIA

ProCogia
www.ProCogia.com

ProCogia delivers end-to-end data solutions, specializing in AI-driven analytics, data engineering, and digital transformation for enterprises across North America. Renowned for agile integration of cloud and advanced LLM technologies, their products empower clients to make smarter, faster decisions. Recent projects include a pioneering SaaS platform for Canadian R&D grant automation and MCP server deployments for clinical informatics. What sets ProCogia apart is deep technical expertise, a consultative approach, and relentless focus on measurable outcomes. Trusted by Fortune 500s and scale-ups.

Sector of Activity: AI, ML and Data.

MANAGEMENT SERVICES

**ProjectEx Management
Services Ltd.**

www.projectexmanagement.com

ProjEx delivers both products and services as a single organization. They connect with technology distributors, nonprofit leaders, SMB decision-makers, and industry partners advancing digital transformation. Their three pillars—Cybersecurity, CRM Implementation, and AI Solutions—help clients streamline operations, unlock growth, and leverage their data. ProjEx empowers organizations to achieve measurable impact and build future-ready communities.

Sector of Activity: AI, CRM, Cybersecurity, Project\Program Management, Softwares.

SenseNet

Sensenet Inc.

www.sensenet.ca

SenseNet is a Vancouver-based company specializing in early wildfire detection and environmental monitoring. Their innovative platform integrates ground-based sensors, high-resolution cameras, satellite data, and AI to detect fires in their earliest stages, helping protect communities, critical infrastructure, natural resources, and lives. They provide tailored solutions for sectors such as mining, municipalities, Indigenous communities, agriculture, and forestry. Their system enables real-time fire detection complimented by climate monitoring and situational awareness across remote, high risk areas.

Sector of Activity: AI, IOT Solutions and Related Network Infrastructure related to Environmental Monitoring and Detection (e.g. Disaster Management Solutions for Wildfire).

Star Solutions
www.starsolutions.com

Star Solutions focuses on enabling cellular networks for operators who face challenges in deploying mobile coverage using conventional network equipment systems. They deliver systems that are easy to install, consume less power and work closely with their customers to tailor the infrastructure to their requirements. They have tailored systems for maritime industry, the mining sector, public safety emergency communications, disaster relief and remote rural telecom.

Sector of Activity: IOT Solutions, Wireless Telecommunications.

Text Groove Communications Inc.
www.textgroove.com

Text Groove is a BC-based messaging platform enabling large-scale audience engagement through SMS and OTT channels. Built for media and sports orgs, its system supports real-time voting, fan interactions, alerts, and high-volume participation. The platform offers a modern messaging orchestration layer, strong compliance tools, and reliable delivery via trusted global providers. Recent projects include nationwide broadcast campaigns, interactive live-show experiences, and new sports fan activations. With event-ready tools, Text Groove helps organizations drive meaningful, measurable engagement.

Sector of Activity: SaaS, Messaging, OTT.

Viion Systems Inc.
www.viionsystems.com

Viion delivers next-generation, AI-powered traffic enforcement and smart mobility solutions deployed in 14 countries. Their proprietary OCR adapts to each nation's license plates for unmatched accuracy. With AI running on the edge, a single device detects multiple infractions, reducing costs and complexity. Low power consumption enables solar deployment, ideal for limited budgets and remote locations. The CortexAI platform securely processes violations. Proven in Ecuador, Mexico, and the USA, Viion's solutions have reduced fatalities, improved mobility, and empowered cities to achieve goals.

Sector of Activity: Intelligent Transportation Systems (ITS), Traffic Enforcement & Road Safety Technology, Artificial Intelligence (AI) for Transportation.
